

Welcome to a new chapter of Pleasanton Pride...

Now every person in Pleasanton can express community pride and environmental awareness by adding "green steward" to their job description. Pleasanton Garbage Service and the City of Pleasanton now offer a Single Stream Commercial Recycling Program, which includes:

- Onsite assessment by PGS of your recycling potential
- Delivery of one 96-gallon Single Stream Recycling Cart
- Weekly pickup service

The Single-Stream method has proven to increase recycling volumes because it does not require participants to sort and separate recyclables. Once PGS picks up combined recyclables, they are separated into categories for transport to appropriate recycling facilities.

If the free 96-gallon cart service is insufficient for your recycling volumes, please call 925-846-2042 for assistance and fee information.

More brochures are available online at www.pleasantongarbage.com.

How to Recycle at Work!

Combine paper, cardboard, cans, plastic bottles, and glass bottles and jars in the same Single-Stream Recycling Cart or designated container. Place your cart outside on service day. It must be in an area accessible for automated recycling truck pickup.

yes...accepted!

office paper and mail
